

Next Day Alerting Field Category Descriptions

Items as listed as they appear in the alert file.

Source	The organization for whom the report is being generated.
CC	The Care Coordinator's name who is connected to the patient (this field is used in cases where HealthlinkNY is provided with a subscription file).
PCP	This is the Primary Care Provider who is linked to the patient in our system. Often times this field is not populated in the documents which are sent to us, which is why this field is blank at times.
Patient Name	The patient's full name.
First Name	The patient's first name.
M.I.	The patient's middle initial.
Last Name	The patient's last name.
Chief Complaint	When available this field will contain the chief complaint for the visit.
Birth Date	The patient's date of birth.
Gender	The gender of the patient.
Admit Date	The date and time of when the patient was admitted to the facility.
Patient Type	What type of visit was this; Outpatient, Emergency, Inpatient, etc.
Discharge Date	When the patient was discharged (if available).
Discharge	Where was the patient discharged to; home, self-care, etc.
Facility	Which facility the patient visited.
Service	The type of service provided.
Visit	What type of visit was this; Outpatient, Emergency, Inpatient, etc.
Patient Type	What type of visit was this; Outpatient, Emergency, Inpatient, etc. (Same as above).
Consent	The consent value of that patient for your organization. The way this report is built, this field should always say "Permit", as we are sending alerts only on consented patients.
Consent Date	The date the consent for the patient was entered.
Account #	The account number.
Visit #	The visit number.
MRN	The associated MRN for the patient to your organization. This is not something which we add normally for the free version of the Next Day Alerting.
